

I have had XM Radio for for 9 months and would never go back to listening to broadcast radio again. XM offers WHAT I WANT in radio and not what local broadcasters feel like giving me. One of the BEST services they have is 24 hour traffic. I use this when I go to Phoenix and it is priceless. I get current conditions WHEN I NEED THEM, not every 20 minutes from the local radio and television stations which are completely useless. Please do not allow XM RAdio to become a victim of local broadcast games. I PAY for my XM access and get what I want as opposed to local braodcast which, while it is free I do pay a "price" which is getting the content THEY want me to have WHEN THEY want me to have it. XM Radio takes care of its customers. Local broadcasts can't say the same thing.
